Serial Mscad Pro is a Windows-based computer aided drafting and design software program developed by Microsoft.Q: Cleaning up ItemsControl I have a TreeView within a Window, and need to keep track of the nodes that I click on. The only problem is that on the TreeView I have an ItemsControl with expandable items. The problem is that every time I click on a node, the logic that deals with which node I've clicked on does nothing. Here is my code: private void TreeView1_OnMouseDown(object sender, MouseButtonEventArgs e) { if (e.Button == MouseButton.Left) { var node = treeView.SelectedItem as TreeViewItem; if (node != null) { TreeViewItem item = TreeView1.SelectedItem as TreeViewItem; foreach (TreeViewItem item2 in treeView.Items) {
